STANFORD'S SERIES OF NEW LIBRARY MAPS

CONSTRUCTED BY A. KEITH JOHNSTON, LL.D., F.R.S.E., F.R.G.S., &c.

Scale, 50 miles to an inch; size 65 inches by 58 inches.

EUROPE,

Engraved in the finest style on copper plates; showing the boundaries of all its Independent States, even the smallest, and the subdivisions of the larger Continental States. The Railways are accurately and distinctly delineated, and the Lines of Submarine Telegraphs are inserted. Price fully coloured and mounted in morocco case, £3. 13s. 6d.; on roller, varnished, £3.; on spring roller £6.

Scale, 110 miles to an inch; size 65 inches by 58 inches.

ASIA.

This new and original work exhibits the Empires and other States of the Oriental World with a stricter regard to their actual boundaries and divisions than any other publication has yet attempted. Although the size of the Map extends to the limits of convenience, its scale of 110 miles to an inch serves to show how inadequate a small map must be for the representation of so large an area. Price, fully coloured, and mounted in morocco case, £3. 13s. 6d.; on roller, varnished, £3; on spring roller, £6.

Scale, 94 miles to an inch; size 65 inches by 58 inches.

AFRICA.

The geographical knowledge recently acquired on the great Continent of Africa presents most surprising examples of the rapid progress of Modern Science. The Great Sahara, formerly represented as a vast sandy waste, has been shown by a succession of noble explorers, from Denham and Clapperton to Duveyrier, to contain grand ranges of Mountains, with varieties of Scenery and other conditions very different from the terrible desert of our imagination. Further South nearly the whole range of Soudan, from the Atlantic to the Red Sea, has been remodelled from the labours of the French in Senegal;—of Barth, Baikie, and others on the Niger;—and of Von Heuglin, Petherick, Speke, and Baker, &c., in the Upper Basin of the Nile. South of the Equator vast spaces have been filled up by Livingstone, Burton, Speke and Grant, Du Chaillu, and Andersson, while great improvements have been made by the Surveys of the Colonial Governments. Stanford's Library Map presents this accumulation of new Discoveries for the first time in a General Map on a large scale. Price, fully coloured and mounted in morocco case £3. 13s. 6d.; on roller, varnished, £3.; on spring roller, £6.
